

**GEO LITH**  
SUSTAINABLE LITHIUM

## Global LinkCorp and GeoLith, two forward-looking companies, have decided to join forces for sustainable lithium production

*Global LinkCorp and Geolith agree to join forces with the ambition to jointly develop sustainable projects in Latin America.*

Global LinkCorp is a Chilean company with more than 30 years of history and committed, through its different subsidiaries (Eco Waste, Link Energy, TctLinkTech and PUEDES), to the development of sustainable societies. In particular involved in clean technology, energy services and waste management, Global LinkCorp offers its customers with renewable and reliable power. Global LinkCorp has operations and long-standing customers all over Latin America.

GeoLith is a French start-up created in 2016, which develops and commercialise Direct Lithium Extraction (DLE) technology, enabling sustainable and local production of this material, critical for the energy transition. Its Li-Capt® technology has been proven in France, the UK and Chile, thanks to its pilot plants. GeoLith is currently expanding its international operations into Latin America, specially in Chile, Argentina and Bolivia.

### A common ambition

Global LinkCorp and GeoLith have the common ambition to build sustainable societies. As a result of this shared motivation, both companies are fully committed to enhance their synergies and bring unique value to their customers, allowing them to operate their assets sustainably, with cutting-edge and reliable technology and providing first-class customer care and assistance.

### Committed to enhance a sustainable industry:

GeoLith and Global LinkCorp together bring sustainable services to the whole value chain of lithium extraction :

- Using Li-Capt® DLE technology, saving water, power and avoiding emissions
- Recycling Li-Capt® material by GeoLith and of any other industrial residue by EcoWaste
- Providing sustainable energy by LinkEnergy
- Providing the wide technical and commercial network of both companies.

### A strong industrial partnership

Pedro Ruiz, Chief Commercial Officer at GeoLith, and Jorge Andrés Escobar, CEO & Director of Global LinkCorp, ideated a strong partnership, adapted to the industrial reality of South American lithium industry. Global LinkCorp will promote Li-Capt® technology and support GeoLith in the development and execution of Direct Lithium Extraction projects. GeoLith will supply its Li-Capt® technology as well as engineering and scientific know-how.

Together, Global LinkCorp and GeoLith will enable a more sustainable and more resilient lithium industry.
